For those of you have and are using the Hy-Tek Team Manager to track athletes and their individual results but can not see performances for the events that this meet uses check the event note (for hurdles, shot, weight throw or pent only). Select the meet, then the events heading and adjust the event note to what you are using. i.e. Shot Put male is 7.26kg yours could be listed as 16 lb or nothing. Change the event notes to what you are using. The import of each entry match is by the event number so as long as your entry is correct by the event # all entries received by using the Hy-Tek meet report will be accurate.
